Professional Experiences and Future motivation

I have had the opportunity to serve the ministry of Public administration in both field level and central government of Bangladesh from 2016 to 2024. In the field level I served as assistant commissioner, and Chief Executive Officer of a sub-district where my role was to implement development and climate policies of the central government. The job responsibilities includes to chair the disaster management committee, implement sustainable development goals in the context of local policy, implementation and Monitoring of development projects, take necessary actions to control the local law and order, and to coordinate all the government and non-government stakeholders in the working area. With this, I aim to contribute to National and International Non-government organizations as intern, professional and consultant in future. Having the central point as the 'Third sector management and it's contribution in sustainable development in the Asia Pacific' I want to be an active team member of organizations working with sustainability, rural development or education in the vulnerable areas of this region.
